

REST O' SURE

Protect What Matters Most to You

A Smart Health Insurance Management System
– Tanmay Dhelia

INTRODUCTION

REST O'Sure

A Smart Health Insurance Management System

Architectural Features:

- Responsive Design
- Microservice Architecture
- Config Server
- Dockerised
- Jenkins Pipeline
- SonarQube QT

Backend:

- Spring 3.1.5
- MySQL
- JWT Authentication

Frontend :

- Angular 21
- Tailwind CSS

WHY USE US ?

Role Based Auth
+ JWT Login

Lazy Loading
Modules

SMTP Gmail
Notification

Analytics Dash
(ChartJS)

RazorPay
Payments

Claims Lifecycle
Completed

Doc Handling -
Cloudinary

Validated
Operations

LAZY LOADING

- Optimised Performance
 - Only Required Components Loaded
- Better Resource Utilization
 - Resources loaded On-Demand.

```
tanmayy-2312@tanmay-2312:~/Desktop/Frontend_Chubb/Capstone/insurance-app$ ng serve
```

Initial chunk files	Names	Raw size

RESPONSIVE DESIGNING

SYSTEM ARCHITECTURE

USER - DATA - FLOW

Admin Creates Plan | Admin handles Employee Accounts (Agent, Provider, Claims Officer)

User Registers | Agent registers a user

User checks & select the plans | Agent showcases the policies and thier benefits

User uploads required Documents | Agent enters Details and docs for the User

User pays using Razorpay Gateway | Agent orchestrates user payment (Gets Commision)

User Raises Claims | Hospital Raises Claims

Claims Officer Reviews → Approves Full/Partial Amount

User Notified on each Milestone

NOTIFICATION

DOCUMENT VERIFICATION

 Your Aadhaar will be securely stored and masked for privacy

Passport Size Photo *

Medical Checkup Document *

PAYMENT (RAZORPAY)

CONCLUSION

This Insurance Management System is a modern, scalable frontend application designed to handle the complete lifecycle of insurance operations. The system supports multiple user roles including members, agents, providers, claims officers, and administrators, each with dedicated modules and features tailored to their specific needs.

The application implements a robust modular architecture with lazy-loaded modules, ensuring optimal performance and clear separation of concerns. Each user role has access to a specific set of features protected by authentication guards and role-based access control.

THANK YOU
